$2^{2}$
$2^{4}$
$2^{6}$
$2^{8}$
$2^{10}$
below lowest boundary
between lowest and middle boundaries
between middle and highest boundaries
above highest boundary
SGD: mean max stable $\eta$ over 5 seeds
HB: mean max stable $\eta$ over 5 seeds
Nesterov: mean max stable $\eta$ over 5 seeds
HB fit: $\eta \propto B(1-\rho)$
Nesterov fit: $\eta \propto B^{\beta}(1-\rho)$, $\beta = 1.5$
Nesterov large-$B$ horizontal fit
